Description

The Invesco Values-Based Developed Markets ex-US Large Cap Value Index is designed to provide exposure to large global developed market ex-US equities that are attractively valued based on free cash flow, earnings, book value of equity, and funds from operations while excluding certain industries (alcohol, tobacco, gambling, weapons and adult entertainment).

Methodology Highlights

The Index Universe includes all constituents of the Invesco Indexing Investable Universe designated as developed market, large capitalization securities, while excluding all US securities and members of the following specific industries: Brewers, Distillers & Wineries, Tobacco, Casinos & Gaming, Aerospace & Defense, and Adult Entertainment Production & Broadcasting. Securities are ranked in descending order by their factor score. Those securities that fall within the top 50% of the cumulative distribution are selected for index inclusion. Sectors are constrained relative to the associated market capitalization benchmark index. Each security selected for Index inclusion is weighted proportionally to its factor-tilted market capitalization.

The Index was launched on 10/31/2018.

All data prior to its launch date is back-tested (i.e. calculations of how the Index might have performed over that time period had the Index existed). Back-tested performance is subject to inherent limitations because it reflects retroactive application of an Index methodology and selection of Index constituents with the benefit of hindsight. Past performance, actual or back-tested, is no guarantee of future performance.

The Total Return Index assumes dividends are reinvested in the Index after the close on the ex-date.
