The index was launched on 10/20/17. All data prior to its launch date is back-tested (i.e. calculations of how the index might have performed over that time period had the index existed). Back-tested performance is subject to inherent limitations because it reflects retroactive application of an Index methodology and selection of index constituents with the benefit of hindsight. Past performance, actual or back-tested, is no guarantee of future performance.

The total return index assumes dividends are reinvested in the index after the close on the ex-date.
