Description

The Invesco Developed Markets ex-Japan All Cap REIT Index (Hedged JPY) is a broad-based benchmark measuring the aggregate performance of global, developed market (excluding Japan) Real Estate Investment Trusts (REITs). The hedged version of the Index uses currency futures on a monthly basis to mitigate currency risks.

Methodology Highlights

The Invesco Developed Markets ex-Japan All Cap REIT Index (Hedged JPY) includes all constituents of the Invesco Indexing Investable Universe designated as developed market (excluding Japan) REIT securities excluding property management, mortgage REITs, and timber REITs. Each security in the Index is weighted proportionally to its float-adjusted market capitalization.

The Index was launched on 09/09/2019. All data prior to its launch date is back-tested (i.e. calculations of how the Index might have performed over that time period had the index existed). Back-tested performance is subject to inherent limitations because it reflects retroactive application of an Index methodology and selection of Index constituents with the benefit of hindsight. Past performance, actual or back-tested, is no guarantee of future performance.

The Total Return Index assumes dividends are reinvested in the Index after the close on the ex-date.
