## Description

The Invesco Global Emerging Markets Low Volatility Index is a broad-based index that employs a factor-based approach to provide exposure to global emerging market, large- and mid-capitalization equities that have exhibited historically lower return volatility.

## Methodology Highlights

The Index Universe includes all constituents of the Invesco Indexing Investable Universe designated as emerging market large- or mid-capitalization securities. The Index weighting scheme is designed to reflect both a security's market capitalization and its factor exposure. Each security selected for Index inclusion is weighted proportionally to its factor-tilted market capitalization.

## Historical performance

## Index performance (%)

	Returns			Annualized returns				Since 12/31/2002

Total Return (TR)	14.24	-9.50	21.90	9.69	-11.76	-1.18	-3.57	22.38	-7.83	25.69

The Index was launched on 6/22/2020.

All data prior to its launch date is back-tested (i.e. calculations of how the Index might have performed over that time period had the Index existed). Back-tested performance is subject to inherent limitations because it reflects retroactive application of an Index methodology and selection of Index constituents with the benefit of hindsight. Past performance, actual or back-tested, is no guarantee of future performance.

The Total Return Index assumes dividends are reinvested in the Index after the close on the ex-date.
