Description

The Invesco Strategic US Index measures the performance of equities for US companies that tend to have larger, higher quality businesses.

Methodology Highlights

The Invesco Strategic US Index includes constituents of the Invesco Indexing Investable Universe designated as US securities. These stocks are ranked in descending order on business-size score. Those securities within the top 90% in cumulative business size are eligible for inclusion in the Index. Of these eligible securities, the 20% of stocks with the lowest quality score are excluded. Each security is then weighted proportionally to its float-adjusted business-size score.

The Index was launched on 6/15/2018. All data prior to its launch date is back-tested (i.e. calculations of how the Index might have performed over that time period had the index existed). Back-tested performance is subject to inherent limitations because it reflects retroactive application of an Index methodology and selection of Index constituents with the benefit of hindsight. Past performance, actual or back-tested, is no guarantee of future performance.

The Total Return Index assumes dividends are reinvested in the Index after the close on the ex-date.
